

Why Choose

TITAN INFLATABLES

LOADED WITH STANDARD FEATURES . . .

- Molded Carry Handles
- Double Axis Fold Down Oarlocks
- 2 Piece Aluminum Floating Oars
- Durable Carrying Bag
- Inflation Pump
- Maintenance Kit
- Bench Seat (with 2 Positions - 270 & larger)
- S.S. Towing Rings
- Boat Cover Included with CS and DR Models
- Bow Handle
- Heavy Duty Rubbing Surface to Protect Underside
- Wide Rubbing Strake Protection on Keels
- Recessed Halkey Roberts Inflation Valves
- 1100 Decitex Polyester Reinforced Fabric
- 5 Year Warranty on Fabric and Seams
- Large Diameter Buoyancy Tubes
- Coast Guard Certified

PF220 SL

PF MODELS

Stable platform for fishing and hunting - camouflage dark green color. Rows well or use with an electric motor or small outboard motor. Convenient storage bag for gear under the bench seat. Bow storage bag with built-in fishing rod holders.

HIGH PRESSURE AIR FLOOR MODELS

The high pressure air floor replaces the need for much heavier wooden or aluminum floorboards. Easy to set up in 10 minutes. Large diameter buoyancy tubes support heavy weight four stroke motors. Deep inflatable keel design.

CS230AIR

CS330AL

ALUMINUM FLOORBOARD MODELS

Sectional aluminum floorboards are lightweight, strong and maintenance free. Easy to mount seats, consoles or other items to the floor. Capable of larger horsepower outboard motors.

SLAT FLOOR MODELS

Popular tenders for both sailboats and power boats. Easy to set up and take down and fits into a small bag. Maintenance free aluminum slats instead of wood. Damage resistant heavy gauge 1100 decitex fabric.

MS230SL

DR240

RIGID HULL MODELS (DR)

Heavy duty rubbing strakes on the underside protect the boat from damage. Molded non-skid deck surface. Longer water line length tube design aft of the transom will handle heavy four stroke outboards and is quicker to step onto plane. Overall cover to protect when inflated and a zippered storage bag when deflated are included.

"V" SHAPE AIR FLOOR (VIB)

The deep "V" hull shape is formed by 2 high pressure floor panels. Small package when deflated, easy to set up, just add air. Soft and dry fun to drive and goes well with low horsepower motors.

CS260VIB
